

Education:

•Madan Mohan Malaviya University of Technology, Gorakhpur	2027
BTech in Mechanical Engineering	CGPA: 6.41
•Indian Institute of Technology, Madras	2027
BS in Data Science and Applications	
•KV Old Cantt, Prayagraj	2023
Class 12th - CBSE	Percentage: 79.4
•KV Old Cantt, Prayagraj	2021
Class 10th - CBSE	Percentage: 93.4

Experience:

•Naadul Milk	May 2025 - July 2025
Data Analytics Intern	Prayagraj
- Orchestrated end-to-end exploratory data analysis on 848+ transactional records using Pandas and numpy, uncovering seasonal demand cycles and B2B vs B2C purchasing patterns. - Identified historical sales trends that drove a 12% reduction in stockouts through data-driven inventory planning. - Delivered executive-level presentations recommending a forecasting methodology later adopted company-wide for B2B order planning.	

Projects:

•Placement Portal Application Flask, Vue.js, SQLite, Redis, Celery	June 2026 - August 2026
- Tools & technologies used: Flask, Vue.js, SQLite, Redis, Celery, SQLAlchemy. - Developed a full-stack placement portal with REST APIs for student profiles, job listings, applications, and recruitment workflows - Implemented Redis caching and Celery-based background tasks for improved application performance and asynchronous processing	
•BDM Capstone (IITM) – B2B & B2C Dairy Analytics	March 2025 - June 2025
Project Link: Link	
- Tools & technologies used: Python, SQL, Machine Learning, Excel, Visualization tools - Awarded Best Capstone Project by IITM for delivering measurable business impact through data-driven sales and inventory optimization. - Built an end-to-end analytics and ML pipeline on real B2B & B2C dairy transactions, improving demand visibility and SKU prioritization. - Improved forecasting accuracy by ~18%, enabling 12% fewer stockouts and 18% better gross margin visibility.	
•Text Classification & NLP Pipeline (MLP Project – IITM)	Feb 2026 - April 2026
Project Link: Link	
- Tools & technologies used: Python, Scikit-learn, NLP, TF-IDF (Word & Character Level), Logistic Regression, LinearSVC, Naive Bayes, LightGBM, Pandas, NumPy - Built an end-to-end NLP pipeline using TF-IDF (word & character level) to classify large-scale text data - Engineered features like word count, vote ratio, and sentiment indicators to improve model performance - Trained and compared multiple models (Logistic Regression, LinearSVC, Naive Bayes, LightGBM), selecting best via validation.	

Skills:

• Languages: Python, SQL, Java, JavaScript
• AI & Machine Learning: Machine Learning, Scikit-learn, Pandas, NumPy, Data Preprocessing, Feature Engineering
• Generative AI: LLMs, RAG, Generative AI, NLP
• Software & Backend Development: Flask, REST APIs, Vue.js, Bootstrap, Celery, n8n
• Databases & Caching: PostgreSQL, MySQL, SQLite, Redis
• Developer Tools: Git, GitHub, VS Code, Jupyter Notebook
• Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Software Engineering
• Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration.
• Areas of Interest: Artificial Intelligence, Generative AI, Machine Learning, Software Development, Backend Development, Full-Stack Development, AI Automation

Position of Responsibility:

•Executive Member, FLUX MMMUT	Sept 2025 - ongoing
Executive Member, Ecell MMMUT	June 2024 - ongoing

Achievements:

•Diploma level Certificate – IIT Madras: Completed advanced coursework in ML, Data Science, and data-driven problem solving.
•Best Capstone Project Award – IIT Madras: Recognized for outstanding performance in the BDM capstone, highlighting innovation, technical rigor, and practical business impact
•Deloitte Data Analytics Virtual Internship Certificate: Simulated a real-world analytics workflow covering ETL, data cleaning, business reporting, and stakeholder presentations
